

Ideal for food halls, entertainment venues, stadiums, and more, GoTab for Multi-Operator locations is here. Streamline and simplify your payouts while allowing all vendors to control their own menus.

Vendors are empowered with access to their own product catalog and sales, while also creating a seamless ordering experience for guests. Get a unified QR ordering experience for all vendors, with all the features and benefits that a single GoTab location would have.

### Sales & Reporting

Vendors get real-time access to individual sales reports.

### Easier Payouts

Payouts, including taxes and tips, are transferred directly to each vendor, on a daily basis.

### Total Menu Control

Each vendor can individually manage their own products and menus.

### The Impact:

- 20% Higher Tips
- 35% – 50% Higher Check Averages
- 25% Faster Table Turns
- 30% – 50% Increased Labor Efficiency

## A Unified Experience with Individualized Control & Reporting

### Transparency in Sales

Payouts will be made directly to each vendor on a daily basis, including tips and taxes and each vendor can access their individual sales and tab data in real-time. For multi-vendor transactions, tips are automatically allocated by percentage of sales. Sales percentage allocation, including any vendor fees, can also be automated to the parent location.

### Individually Customized

Though all vendor menus are available from the same QR, each vendor can create their own menus and products to align with their brand. Orders are routed to their respective vendors' Kitchen Display System and/or printer. Vendors can add and customize notices to their individual menus, easing communication with their guests.

### Increased Visibility

Guests can view all vendors' menus directly from one QR code, amplifying the visibility that vendors have and easing the guests' ordering experience – no app downloads required.

### How it Works

Individual vendors will have their own dashboard and create their own menu and products.

Each menu is then shared with the parent location.

Guests will scan and order from one QR showcasing all vendors.

Once guests pay their tab, tips are allocated to each vendor by percentage of sales.
